PROFESSIONAL SUMMARY

Computer Science & Engineering graduate with hands-on experience building responsive web applications using React.js, JavaScript, Node.js, Express.js, and MongoDB. Experienced in REST APIs, authentication, responsive UI development, API integration, and full-stack project development. Seeking a Junior Frontend, React.js, or MERN Stack Developer opportunity.

Technical Skills

- **Languages:** Java, JavaScript, HTML5, CSS3, SQL, Python (Beginner)
- **Frontend:** React.js, React Router, Bootstrap, Tailwind CSS, React Bits UI, Framer Motion
- **Backend & APIs:** Node.js, Express.js, REST APIs, Axios
- **Database:** MongoDB, Mongoose, SQL
- **Authentication & Services:** Passport.js, Session-based Authentication, Protected Routes, Cloudinary
- **Tools:** Git, GitHub, Postman
- **Other:** Responsive Web Design, API Integration, Local Storage

Projects

Find Your Stay | Full-Stack Web Development (MERN)- find-your-stay-maao.onrender.com/listing

- Developed a full-stack accommodation listing platform inspired by Airbnb, enabling users to create, browse, update, and manage property listings.
- Implemented authentication and authorization using Passport.js, session-based login, and protected routes.
- Designed MongoDB/Mongoose data models for users, listings, reviews, and application data.
- Integrated Cloudinary for secure property image uploads and media management.
- Built responsive interfaces using EJS, Bootstrap, HTML5, and CSS3 and deployed the application online.

Personal Portfolio Website | React.js & Tailwind CSS - portfolio-shaquib.netlify.app

- Designed and developed a responsive portfolio website to showcase skills, projects, education, and contact information.
- Built reusable React components for Hero, About, Skills, Projects, Contact, and Footer sections.
- Implemented responsive layouts and modern UI interactions using Tailwind CSS and Framer Motion.
- Added dark/light mode, responsive navigation, project cards, social links, and an interactive contact section.

Fix My Area | Full-Stack / Front-End Web Development – fix-my-area.netlify.app

- Built a civic issue reporting application for reporting road damage, water leakage, garbage issues, and streetlight failures with images and descriptions.
- Designed a responsive, user-friendly interface with a mobile-first approach.
- Implemented complaint tracking and real-time status updates to improve transparency between citizens and municipal authorities.
- Integrated REST APIs for data handling, image uploads, and issue management communication and speeding up issue resolution.
